

# INSTALLING MONTECARLITO

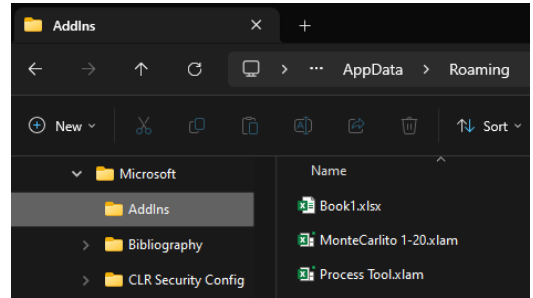

MonteCarlito is a standard format Microsoft Excel Add-In, developed in VBA. Installation is a simple matter of putting the MonteCarlito file where Excel expects to find it and making it a trusted file.

C:\Users\yourname\apdata\Roaming\Microsoft\Addins

1. Locate your local copy of MonteCarlito 1-20.xlam and copy it.
2. Locate the Addins Folder and paste the file to that location.

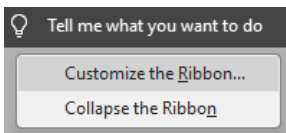

3. Right click on the MonteCarlito file and select "Properties."
4. From the pop-up dialog, check the "Unblock" box and hit OK.

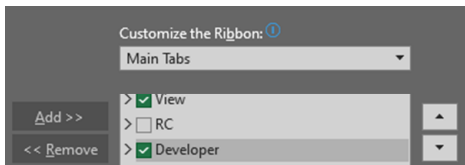

Open MS Excel

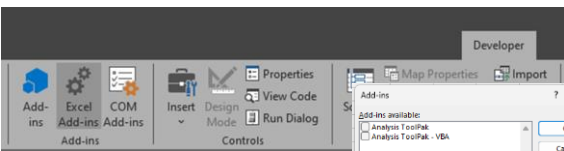

5. If the developer tab is not activated on your computer, right click on the menu ribbon and select "Customize the Ribbon."

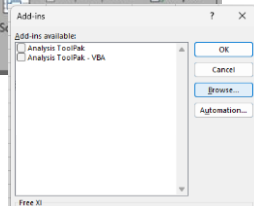

6. In the right hand pane ("Main Tabs"), locate and check the box for the Developer tab, then hit OK.

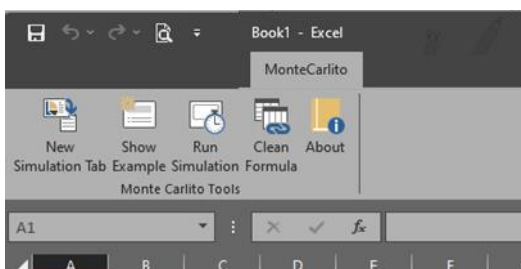

7. On the developer tab, select "Excel Add-ins."

8. From the buttons on the right side, select "Browse." The standard Windows file selection dialog box will pop-up. It will already be pointing to the Addins directory.

9. Select the MonteCarlito addin file and hit OK until you get back to Excel.

You should now see the MonteCarlito menu ribbon tab.
